### Credit Risk

#### (i) Qualitative Disclosures

The Bank's policies primary objective is to strike a proper balance among the 3 core principles of liquidity, profitability and safety of assets and provide a holistic approach to risk management. This policy aims at achieving these objectives by applying the following broader principles: -

- Ensure credit growth, both quantitatively and qualitatively, confining to the types of lending, which by and large matches Branch liability profile for maximization of profits by augmenting interest and non-interest income.
- Maintaining the quality of assets at satisfactory level through proper appraisal, review and monitoring.
- Control various risks in lending through caps on per borrower/ group exposures, sectorial exposures, delegation of sanctioning powers to various levels, counter party risk and country risk exposure level etc and monitor the same to ensure balanced and diversified growth of credit.
- Proper classification of loans and advances and loan loss provisioning so as to reflect a true and fair view of profit/loss and assets/ liabilities.

#### Strategies and processes:

In order to realize the above objectives of Credit Risk Management, the Bank prescribes various methods for Credit Risk identification, measurement, grading and aggregation techniques, monitoring and reporting, risk control/ mitigation techniques and management of problem loans/ credits. The Bank has also defined target markets, risk acceptance criteria, credit approval authorities, and guidelines on credit origination/ maintenance procedures.

The strategies are framed keeping in view various measures for Credit Risk Mitigation, which includes identification of thrust areas and target markets, fixing of exposure ceiling based on regulatory guidelines and risk appetite of the Bank, minimizing concentration Risk, and pricing based on rating.

Bank from time to time would identify the potential and productive sectors for lending, based on the performance of the segments and demands of the economy. The Bank carefully restricts its exposures in sectors which have limiting growth potentials, based on the Bank's evaluation of industries/ sectors based on the prevailing economic scenario prospects, etc.

The operational processes and systems of the Bank relating to credit are framed on sound Credit Risk Management Principles and are subjected to periodical review.

The Bank has comprehensive credit risk identification processes as part of due diligence on credit proposals.

## Johannesburg Branch

### **The scope and nature of risk reporting and / or measurement systems:**

Bank has an appropriate credit risk measurement and monitoring processes. The measurement of risk is through a pre-sanction exercise of credit risk rating and scoring models put in place by the Bank. The Bank has adopted 'Standardized Approach' for entire credit portfolio for credit risk measurement.

### **Policies for mitigating risk and strategies and processes for monitoring the continuing effectiveness of the mitigants :**

Bank primarily relies on the borrower's financial strength and debt servicing capacity while approving credits. Bank does not excessively rely on collaterals or guarantees as a source of repayment or as a substitute for evaluating borrower's creditworthiness.

In order to manage the Bank's credit risk exposure, the Bank has adopted credit appraisal and approval policies and procedures that are reviewed and updated by the Risk Management Wing at Head office in consultation with other functional wings. The credit appraisal and approval process is broadly divided into credit origination, appraisal, assessment and approval, and dispensation.

The Bank's policy is to ensure portfolio diversification and evaluate overall exposure in a particular industry / sector in the light of forecasts of growth and profitability for that industry, and the risk appetite of the Bank. The Bank monitors exposures to major sectors of the economy and specifically exposure to various industries and sensitive sectors. The Bank's exposures to single and group borrowers as also substantial exposure is fixed as per the risk rating of the borrowers and monitored periodically in order to keep the exposure level within the prudential ceiling norms prescribed by host and home country regulators.

The credit approval process is a critical factor and commences with the mandatory credit risk rating of the borrower as a pre sanction exercise. The measurement of Credit Risk associated with the borrower evaluates indicative factors like; borrowers' financial position, cash flows, activity, current market trends, past trends, management capabilities, experience with associated business entities, nature of facilities etc. Bank has set up Credit Approval Committee for sanction of loans.

**Loans Past due and Impaired:** The Bank has policy based on the prudential norms applied for income recognition, asset classification and provisioning, to classify an exposure as Overdue, Special mention and Non Performing/Impaired.
